

Large Outerframe

701204 (Rustique) 701203 (System 10)

Halo Outerframe information

Available to order via **E-Shop**

Code: **701204 (Rustique) 701203 (System 10)**

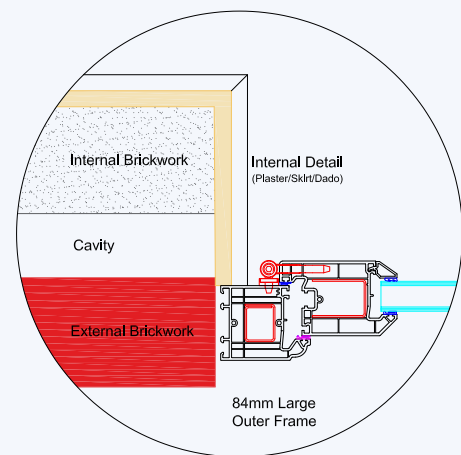

Halo fabricators are now able to access the benefits brought by the addition of a large outerframe to the Rustique and System 10 ranges.

Rather than using a frame extension to the 72mm outerframe, the 84mm option provides a simple solution with more benefits for fabricators, installers and homeowners.

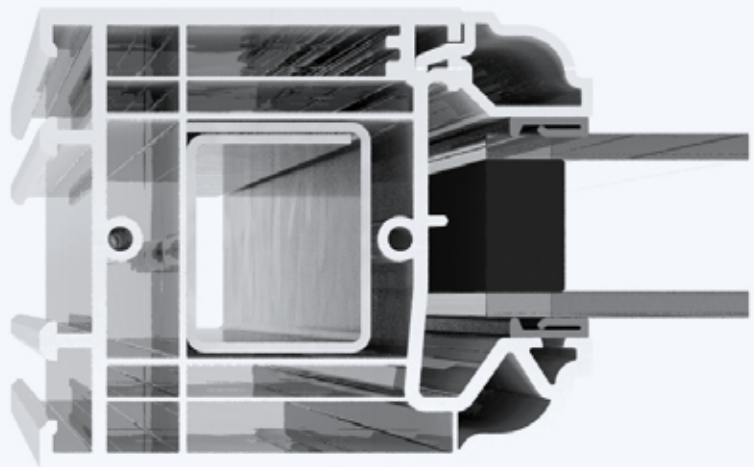

Pack Quantity – 2 lengths
Minimum Order Quantity – 1 pack

Features & Benefits

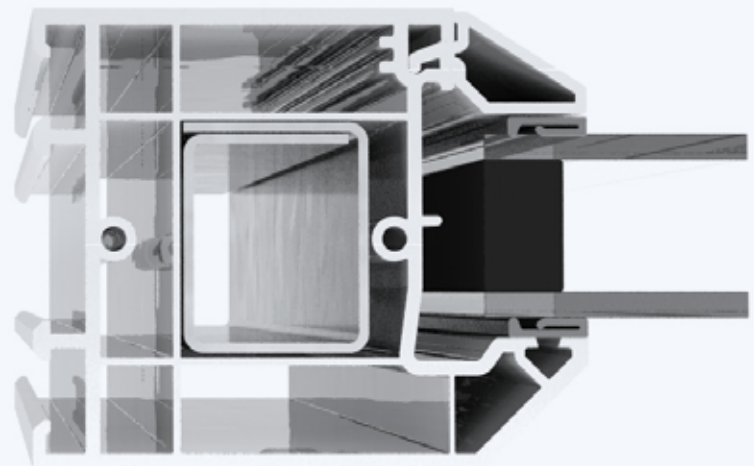

- Large outerframe allows more hinge-side plasterline clearance on residential doors without the addition of a 15mm frame extension.
- One stock item instead of the outerframe and the frame extender – especially useful on coloured frames
- No unsightly join line where extension meets the frame.
- No mismatch of foils on the extension when running alongside each other
- Same reinforcing as used in the 72mm outer – no additional stock items
- All hardware used on the 72mm outerframe can also be used on the 84mm outerframe
- Available in colours across the Variations offer
- Both chamfered and sculptured options available
