

## Features

- The VEKAscreen system is centred around an aluminium mullion capable of large spans, while maintaining narrow sightlines and thermal efficiency.
- All VEKA and Halo 70mm systems may be used in conjunction with the mullion to produce a screen wall.
- The system is capable of spanning multiple floor levels.
- Windows and doors are secured to the mullions with an aluminium pressure plate and PVCu cover/stick system, drained and ventilated.
- The system has built-in thermal breaks and expansion/contraction elements.
